22-38cm	1	VX810		

The VX810 bipod is a lightweight and robust accessory, available in aircraft-grade aluminum alloy T7075 and carbon fiber. Its height is adjustable from 22 to 38 cm and its grooved legs ensure parallel locking at different heights, providing stability and precision. The legs are equipped with locks for smooth adjustment, ensuring that they always remain the same length. Ideal for those looking for a reliable and versatile support for their filming activities.
